Assistant Commissioner for Patents  
Washington, D.C. 20231

Sir:

This Amendment is being submitted in response to the Office Action dated October 16, 1997 in the above-identified patent application.

IN THE CLAIMS

Please amend claims 19, 65, 73 and 78 as follows:

*Sub 71* 19(Three Times Amended). A microprocessor system, comprising a single integrated circuit including a central processing unit and [a] an entire ring oscillator variable speed system clock in said single integrated circuit and connected to said central processing unit for clocking said central processing unit, said central processing unit and said ring oscillator variable speed system clock each including a plurality of electronic devices correspondingly constructed of the same process technology with corresponding manufacturing variations, a processing frequency capability of said central processing unit and a speed of said ring oscillator variable speed system clock varying together due to said manufacturing variations and due to at least operating voltage and temperature of said single integrated circuit.
